Principal's Message

I believe in upholding high standards with an absolute commitment to strive to understand and improve the educational process, using team strategies, while wholly centering on student achievement.

Our staff fruitfully employs two diverse strategies that are of Love and Logic to foster a positive learning environment for all our students. Love and Logic may seem like two contrasting forces. While love helps nurture trusting relationships, where students feel respected, appreciated and loved by the teachers, logic helps develop in students personal responsibility, self control, good decision making skills, self confidence, and character building with high moral values.

Your child's learning involves and revolves around an effective partnership between home & school. We know the stronger the partnership is the more, your child will benefit.

Whilst we know that the information here will give you answers to some of your questions, we also know that learning is social, and in this context we encourage you to come and speak to us in person for a more detailed perspective. I look forward to working with you as we help create a school where parents are welcome at anytime, students are engaged in meaningful learning and the staff members are valued and appreciated for their effort
